

Invitation to Seminar Talk

A many-body RAGE theorem

Mathieu Lewin

Université Paris-Dauphine

Host: Robert Seiringer

I will describe a new RAGE theorem for N-body quantum systems, proved in collaboration with Jonas Lampart (Paris-Dauphine). The result says that only bound states of systems with $0 \leq n \leq N$ particles persist in the long time average. The limit is formulated by means of an appropriate weak topology for many-body systems.

Thursday, April 9, 2015, 4:00pm

Seminar room Mondi 2, Central Building, ground floor

This invitation is valid as a ticket for the IST Shuttle from and to Heiligenstadt Station. Please find a schedule of the IST Shuttle on our webpage (note that the IST Shuttle times are highlighted in dark green):

http://ist.ac.at/fileadmin/user_upload/pdfs/IST_shuttle_bus.pdf

The IST Shuttle bus is marked IST Shuttle (#242) and has the Institute Logo printed on the side.
