

The virus – solutions

B. The correct answers are:

1. Bacteria are living beings. Viruses are not living beings. This is **true**.
2. Viruses have their own metabolism. This is **false**.
3. If viruses use healthy body cells as “virus production factories“, the cells usually easily survive. This is **false**.
4. A cell that is attacked by a virus and used for its reproduction is called a **host cell**.
5. Viruses can reproduce without a host cell. This is **false**.
6. Viruses can stick to surfaces, such as a door buckle. This is **true**.

C. You find the hidden words here:
