Senior Windows & Exchange Systems Engineer

Full Time (40h/w)
Klosterneuburg (Vienna), Austria / Home Office possible
€ 45,000* gross/year

IST Austria is growing. Grow with us!

IST Austria is a growing international institute for conducting frontier research in mathematics, computer science, and the life and physical sciences. We recruit passionate professionals from all over the world and from all fields who support our goals of excellence in research and science management. Located on a beautiful campus on the outskirts of Vienna, we offer numerous opportunities for personal growth in a stable working environment. Get an insight!

Your responsibilities

You will be part of the IT infrastructure team, which designs, plans, builds and carefully looks after the on-premises networks and systems that help our scientists do cutting-edge research. You will be the Subject Matter Expert when it comes to Microsoft server systems and Exchange Mail platform administration. As you will work in a dynamic environment, developing and providing new services for our campus users will also be a big part of this position.

• Participate in design deployment and maintenance of IT systems and services – especially for Windows servers and VMware virtualization
• Provide 2nd-level and 3rd-level IT support for our users
• Respond to software and hardware outages
• Implement and maintain scripts for the automated management of systems
• Document configuration of servers, services and applications; provide end-user documentation

Your profile

• Profound experience/knowledge of Windows Server operating systems and applications (AD, Exchange, WSUS, Windows Active Directory, etc)
• Experience with Linux systems is an advantage
• Understand basic network principles: TCP/IP, LAN/WAN, WLAN, DHCP, DNS, Routing and Switching
• Experience with automation tools (Ansible), programming and scripting languages like Python, Perl, and Powershell
• Some understanding of container technologies and orchestration (Docker, Kubernetes)
• Used to work with IT service management, IT security frameworks (ITIL, ISO 27001, etc)
• Eager to learn new technologies and the flexibility to develop in a changing environment
• Good command of English (working language)
